

Navigate to **Phone > Action URL** and add the command to the appropriate line after enabling this option.

The screenshot shows the Akuvox web interface. On the left is a navigation menu with the following items: Status, Intercom, Account, Network, Phone (expanded), Time/Lang, Call Feature, Voice, Action URL, Multicast, Call Log, Door Log, and WebRelay. The main content area is titled 'Action URL' and contains a form with the following fields:

Action URL	
Active	Enabled
Make Call	<input type="text"/>
Line Up	<input type="text"/>
RelayA Triggered	<input type="text"/>
RelayB Triggered	<input type="text"/>
RelayA Closed	<input type="text"/>
RelayB Closed	<input type="text"/>
InputA Triggered	<input type="text"/>
InputB Triggered	<input type="text"/>
InputA Closed	<input type="text"/>
InputB Closed	<input type="text"/>
Valid Card Entered	<input type="text"/>
Invalid Card Entered	<input type="text"/>

The command is as follows: [replace **IPADDRESS** with DOORBELL IP address]

<http://IPADDRESS/api/call/hangup>
