

Here you will find the setting to disable the automatic LED feature activated by motion on various models. Each model has a slightly different LED setup, and therefore slightly different LED settings.

Log into your device in your normal web browser using the device's IPv4 address.

In most cases you can find the motion setting under the **Intercom** tab under **LED Setting**. In some models the location is different, but has the same function.

*Please find your model for the LED setting that matches in your case:*

## R20A

The screenshot shows the Akuvox web interface for the R20A model. The left sidebar contains a navigation menu with the following items: Status, Intercom, Basic, Advanced, LED Setting (highlighted), Ring, Input, Wiegand, Live Stream, RTSP, ONVP, Motion, Card Setting, Schedule, Action, HTTP API, Account, Network, Phone, Access Whitelist, Upgrade, and System. The main content area is titled "LED Setting" and is divided into two sections: "LED Status" and "LED Control".

**LED Status**

State	Color Off	Color On	Blink Mode
NORMAL	OFF	Blue	Always On
OFFLINE	OFF	Red	2500/2500
CALLING	OFF	Blue	2500/2500
TALKING	OFF	Green	Always On
RECEIVING	OFF	Green	2500/2500

**LED Control**

LED Control	Disabled
Wake Mode	Manual
Card LED Enable	Disabled

At the bottom of the LED Control section are "Submit" and "Cancel" buttons.

**Help**

**Note:**  
Max length of characters for input box:  
255: Broadsoft Phonebook server address  
127: Remote Phonebook URL & AUTOP Manual Update Server URL  
63: The rest of Input boxes
